

Water resilience with EU projects

Online
Thu May 30th, 2024

#WaterWiseEU

Co-funded by
the European Union

INTRODUCTION

The LIFE ECOdigestion 2.0 project is a clear example of how we can add innovation for greater water resilience in Europe. **To achieve maximum impact and obtain stronger solutions, it is essential to approach and generate synergies with other European projects** that pursue and are aligned with the same or similar objectives. This is how we join in this Green Week event with an online event that favours the creation of opportunities thanks to the exposure and conversation with other water and/or energy innovation driver projects.

The agenda for our event will be divided into **two main parts**. Firstly, we will present the projects and initiatives undertaken by LIFE ECOdigestion 2.0, showcasing our efforts in promoting water resilience through cutting-edge technologies and practices. This presentation will offer insights into our work and demonstrate the impact we aim to achieve.

Following the project presentations, the second part of the event will focus on generating conversations and addressing questions from the attendees. This interactive session aims to engage participants in discussions about water resilience, encouraging the exchange of ideas, experiences, and best practices.

Moderator: Adrián Noheda (Project Manager Finnova Foundation)

10:30 - 10:45

Institutional Welcome

Introduction to the importance of EU projects in innovation, sustainability, and water resilience across Europe

Speaker: JOACHIM D'EUGENIO

Policy Adviser for Zero Pollution, European Commission - DG Environment

10:45 – 10:55

Introduction

Introduction to LIFE Programme and opportunities of EU Fundings

Speaker: Juanma Revuelta, CEO Finnova Foundation

Co-funded by

10:55 – 11:15

Project

Consortium

Presentations

Global Omnium, Carlos Lafita, R&D Technician (TBC)

Introduction to the LIFE ECOdigestion 2.0 project, its goals, and the impact on sustainable water management.

Águas do Centro Litoral, Sandra Jorge, R&D, and Innovation Coordinator

Finnova Foundation, Lola Bordás, CMO

11:20 – 12:20

Roundtable: Synergies and LIFE Project Presentations

Exploring synergies among various LIFE projects, focusing on environmental sustainability, energy efficiency, and innovative solutions in water management.

Participants:

- **LIFE LESS WATT** Project (*Speaker* – Cecilia Caretti, Researcher Department of Civil and Environmental Engineering University of Florence)
- **ULTIMATE** Project – (*Speaker* – Dr Isam Sabbah, Associate Professor & Senior Researcher at the Institute of Applied Research, The Galilee Society)
- **BOOST-IN** Project – (*Speaker* – Angela Magno Malagón, R&D Project Manager Director Communication and Marketing BIOAZUL)
- **GREENLIFE4SEAS** Project (*Speaker* – Dr Rossella Petti, PhD Bari Polytechnic University Department of Civil, Environmental and Territorial Engineering, Building and Chemistry)
- **LIFE ECODIGESTION 2.0** Project (*Speaker* – TBC)

12:20 - 12:30

Closing Remarks

Final thoughts, how to get involved, and next steps for LIFE ECOdigestion 2.0 and partner projects.

Speakers: Juanma Revuelta and Moderators
